Technical Data Sheet

Jotafloor Tex

Product description

This is a two component amine cured solvent free epoxy coating. It is applied to create an orange peel texture which is easy to maintain. It provides a seamless surface with excellent chemical, abrasion and impact resistance. The texture provides an Anti Slip mechanism. If additional slip resistance is required Jotafloor Non Slip aggregates can be induced in to the system. To be used as finish coat in atmospheric environments. Suitable on approved primers on concrete substrates.

Typical use

Designed for a wide range of floors and walls with various levels of mechanical and chemical exposure. Recommended for car parks, warehouses, garages, dairies, factories, laboratories, aircraft hangars, food, beverage and plant rooms.

Approvals and certificates

Determination of Compressive Strength - ASTM C579

Additional certificates and approvals may be available on request.

Colours

according to colour card

Product data

Property	Test/Standard	Description
Solids by volume	ISO 3233	98 ± 2 %
Gloss level (GU 60 °)	ISO 2813	semi gloss (35-70)
Flash point	ISO 3679 Method 1	100 °C
VOC-US/Hong Kong	US EPA method 24 (tested)	11 g/l

The provided data is typical for factory produced products, subject to slight variation depending on colour. All data is valid for mixed paint.

Gloss description: According to Jotun Performance Coatings' definition.

Film thickness per coat

Typical recommended specification range

Dry film thickness	300	-	600	μm
Wet film thickness	300	-	600	μm
Theoretical spreading rate	3,3	-	1,7	m²/l

Date of issue: 4 January 2017

This Technical Data Sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com

Surface preparation

To secure lasting adhesion to the subsequent product all surfaces shall be clean, dry and free from any contamination.

Voids/blow holes to the substrate should be filled using appropriate products from the Jotafloor range. To achieve an even surface the concrete or screed substrate has to be primed or levelled prior to carrying out the application of Jotafloor Tex.

Surface preparation summary table

	Surface preparation	
Substrate	Minimum	Recommended
Concrete and Coated surfaces	Clean, dry and undamaged compatible coating (ISO 12944-4 6.1)	Clean, dry and undamaged compatible coating (ISO 12944-4 6.1)

Application

Application methods

The product can be applied by

Roller:

Use of a foam roller will provide the best finish results. Use a honeycomb roller to achieve a textured orange peel effect.

Conditions during application :

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying. The moisture content in the substrate should not exceed 4 % (by weight). The coating should not be exposed to oil, chemicals or mechanical stress until fully cured.

Product mixing ratio (by volume)

Jotafloor Tex Comp A	4 part(s)
Jotafloor Tex Comp B	1 part(s)

NO PART MIXING. Use a slow speed drill and mixing paddle. Pour the full contents of the mixed material onto the floor immediately after mixing is completed.

Thinner/Cleaning solvent

Thinner:

Jotun Thinner No. 17

Date of issue: 4 January 2017

This Technical Data Sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com

Drying and Curing time

Substrate temperature	10 °C 23 °C
Surface (touch) dry	12 h 4 h
Walk-on-dry	18 h 6 h
Dry to over coat, minimum	36 h 12 h
Dried/cured for service	36 d 24 d

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness.

Walk-on-dry: Minimum time before the coating can tolerate normal foot traffic without permanent marks, imprints or other physical damage.

Dry to over coat, minimum: The shortest time allowed before the next coat can be applied.

Dried/cured for service: Minimum time before the coating can be permanently exposed to the intended environment/medium.

Induction time and Pot life

Paint temperature	23 °C
Pot life	30 min

45 min. after poured on to the floor.

Product compatibility

Depending on the actual exposure of the coating system, various primers and topcoats can be used in combination with this product. Some examples are shown below. Contact Jotun for specific system recommendation.

Previous coat:	Jotafloor Sealer or Jotafloor SF PR 150 or Jotafloor Solvent Free Primer
Subsequent coat:	Jotafloor Topcoat Comp A or Jotafloor Topcoat E or Jotafloor PU Topcoat

Packaging (typical)

	Volume	Size of containers	
	(litres)	(litres)	
Jotafloor Tex Comp A	14.4	20	
Jotafloor Tex Comp B	3.6	5	

The volume stated is for factory made colours. Note that local variants in pack size and filled volumes can vary due to local regulations.

Storage

Date of issue: 4 January 2017

This Technical Data Sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com

Technical Data Sheet Jotafloor Tex

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Shelf life at 23 °C

Jotafloor Tex Comp A Jotafloor Tex Comp B 12 month(s) 48 month(s)

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

Health and safety

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

Colour variation

When applicable, products primarily meant for use as primers or antifoulings may have slight colour variations from batch to batch. Such products may fade and chalk when exposed to sunlight and weathering.
